

'+' vs concat()

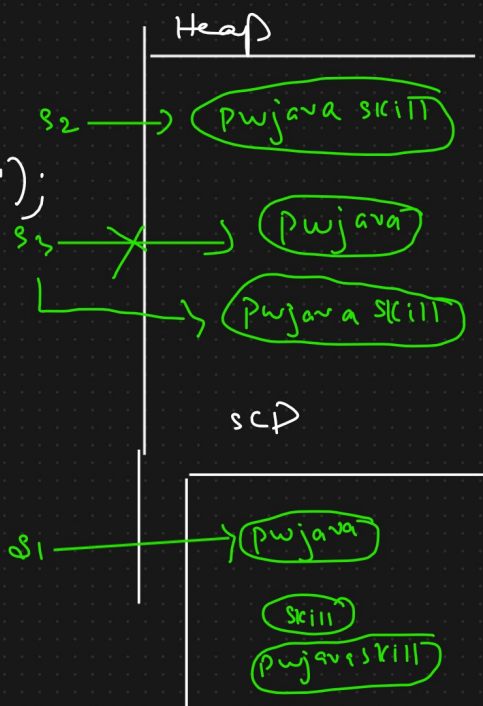

```
String s1 = new String("pwskill");
s1 = s1.concat("Bangalore");
s.op(s1); // pwskill
```

```
String s1 = "pwjava";
String s2 = s1.concat("skill");
```

```
String s3 = new String("pwjava");
s3 = s3.concat("skill");
```

```
s.op(s1); // pwjava
s.op(s2); // pwjavaskill
s.op(s3); // pwjavaskill
```

```
String s1 = "pw";
String s2 = "pw" + "java";
String s3 = "pw" + "java" + "B78";
String s4 = s1 + s2;
```

```
String s5 = "pw" + 100 + 99;
s.op(s1) // pw10099
```

```
"pw100" + 99
("pw10099")
```
